

LAHAB (BARIJ Munitions) is one of the subsidiaries of the EDGE strives to conduct its business of manufacturing of all ranges of ammunition, ranging from Small Arms ammunition, Infantry ammunition, Artillery ammunition and Aircraft ammunition & to provide the related ammunition services with emphasis on service life surveillance with a total commitment to supply meeting to our Customer's needs, both internal and external; and conformance to all Occupational Health and Safety requirements.

Vision

To prevent or minimize the effects of fatigue of employees in accordance with company procedures by recognizing the factors which could contribute to and increase the risk of fatigue such as extended commuting time, Job demands, more concentration, early starts or late finishes work schedules, limited breaks between shifts or overtime, which limit the time an employee can physically and mentally recover from work.

Mission

To ensure and manage human resources fatigue in the workplace by implementing the required control measures, such as alertness, attentiveness, alternate man power and employees motivation which are monitored and reviewed at regular intervals to make sure they continue to manage fatigue effectively and to avoid incident due to fatigue.

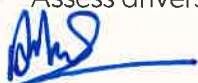

Commitment

LAHAB (BARIJ Munitions) top management is committed to achieving a high standard of fatigue awareness and management at all workplaces and sites. This policy is deliberately broad and outlines the minimum standards acceptable for the management of driver's fatigue.

Therefore

All Departmental Managers / Technical Lead(s) are nominated as Responsible Person to oversee the fatigue at all workplaces and sites and Human Capital & General Services (HC&GS) Manager is nominated to oversee the requirements of driver's fatigue;

- Provision of sufficient resources.
- Take steps to identify areas of drivers fatigue risk.
- Provide a commitment to avoid/reduce the risks associated with fatigue.
- Ensure that appropriate identified controls are implemented.
- Provide suitable and sufficient training.
- Ensure that incidents are adequately investigated to determine if fatigue was an influencing factor.
- Assess drivers' fitness for work.
